

Methodology

Global Strategy Group conducted an online survey of **502 persuadable registered voters in the Rust Belt (Minnesota, Michigan, New Hampshire, Pennsylvania, and Wisconsin) and the Sun Belt (Arizona, Florida, Georgia, North Carolina, Nevada and Texas*)**, with additional samples of **401 non-Republican younger voters, 301 non-Republican Latinx voters, and 302 non-Republican African American voters**. This research was conducted between May 1st and 10th, 2020 and the samples have a margin of error of +/-4.4%, +/-5.6%, +/-4.9%, and +/-5.6% respectively.

Persuadable are defined as anyone:

- Who is in categories 3-5 on the following scale AND
- NOT a strong Democrat or a strong Republican
 1. Definitely vote for the Democrat, regardless of who the Democrats nominate
 2. Probably vote for the Democrat, regardless of who the Democrats nominate
 3. Undecided/Depends on candidate, but lean Democrat
 4. Undecided/Depends on candidate, no lean
 5. Undecided/Depends on candidate, but lean Trump
 6. Probably vote for Trump, regardless of who the Democrats nominate
 7. Definitely vote for Trump, regardless of who the Democrats nominate

Persuadable presidential voters lean to the center-right

Partisanship

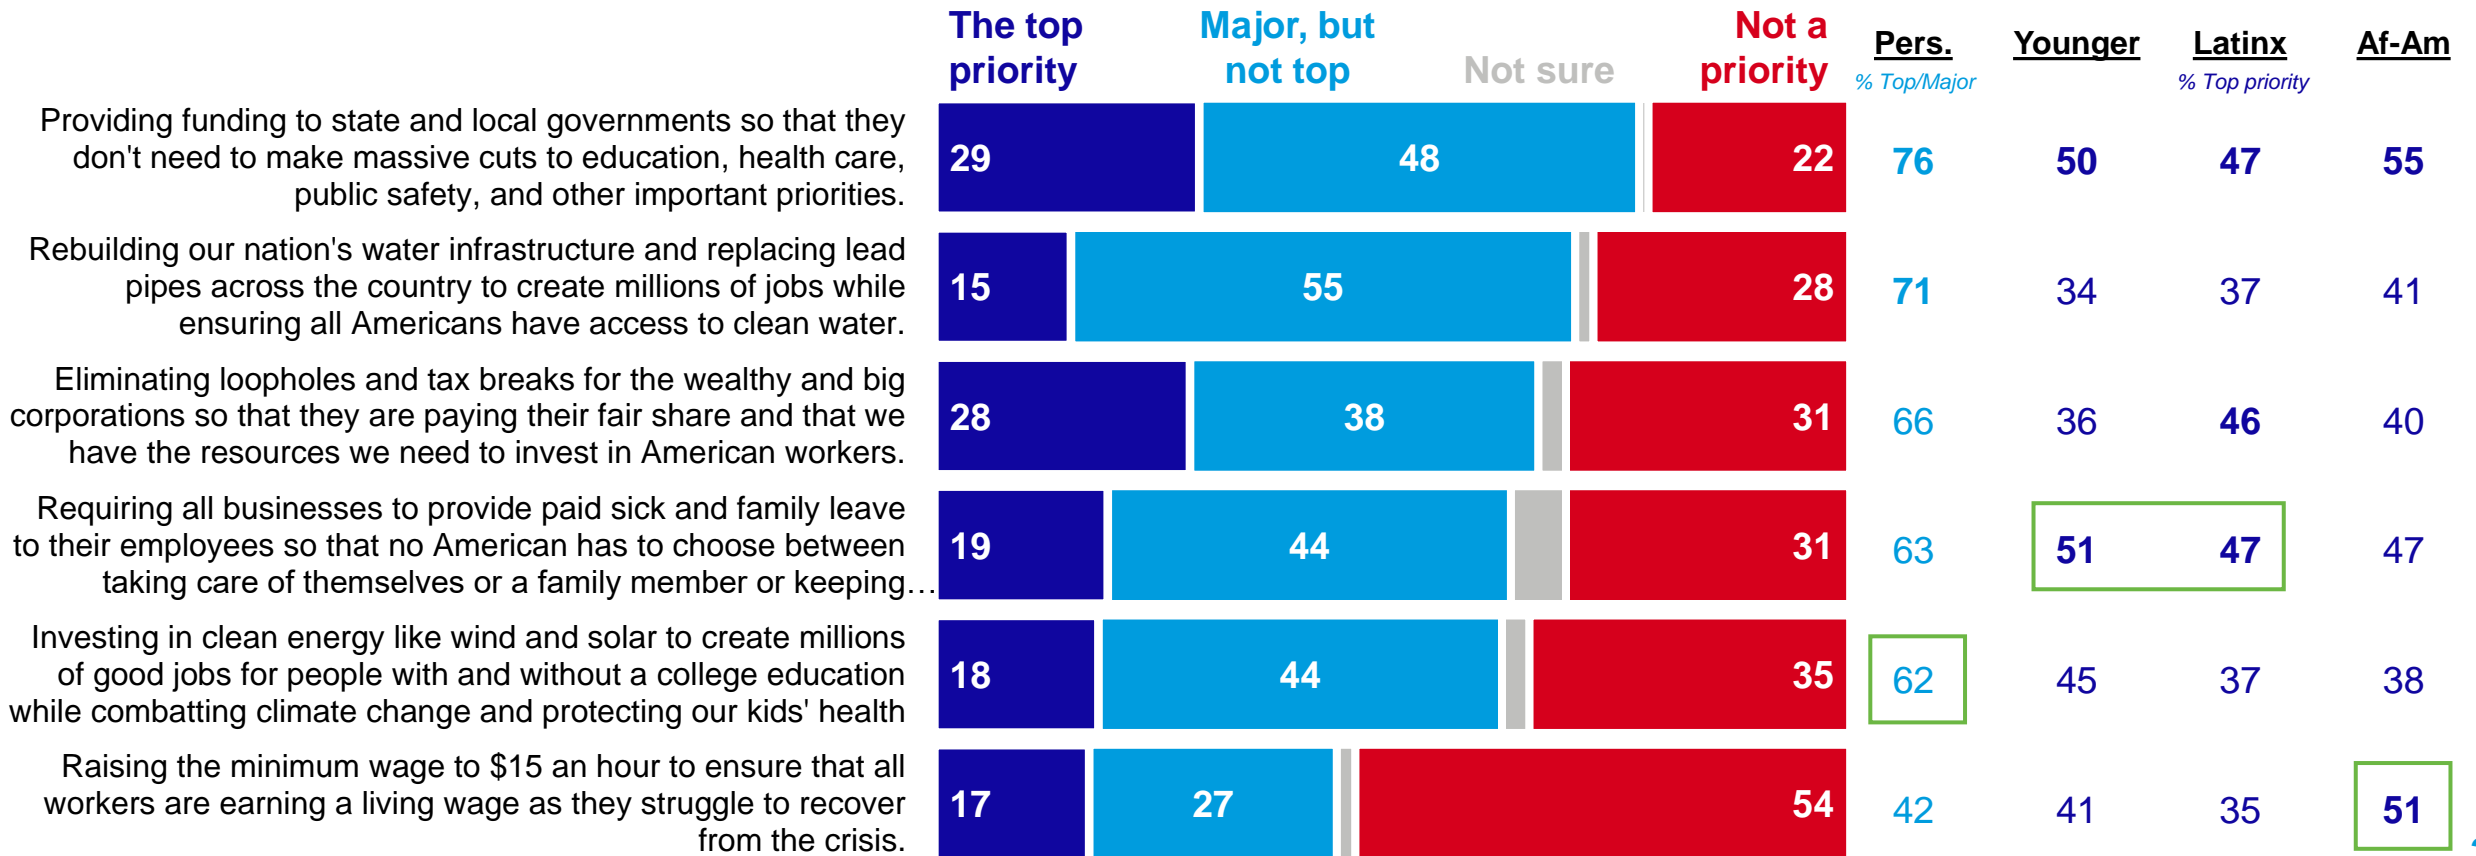

Generic Vote for Congress

For recovery, voters want to fund state/local govts and investment in water infrastructure. Clean energy a major priority for 62%.

Below is a list of policies that some people have proposed to help the US economy recover from the impacts of the coronavirus pandemic. Please indicate how much of a priority each one should be for the federal government moving forward. (Persuadable)

Despite GOP lean of persuadable group, Dem argument in favor of clean energy as part of recovery, easily beats GOP argument against

Below are two statements about the kinds of policies that we should implement to help the country's economy recover from this crisis. Which statement do you agree with more, even if neither is exactly right?

Democrats who say that, instead of giving more bailouts to big oil companies and their CEOs as the Republicans want to do, we should be focusing on policies that will provide the best bang for our buck in putting people back to work now AND invest in the jobs and industries that will help us in the future. Investing in clean energy will create millions of good-paying jobs for all kinds of workers while protecting our kids' health.

vs.

Republicans who say we should be focusing on policies that will help American workers and business - including the American oil and gas industry - recover from the economic impacts of the coronavirus crisis, not using the crisis as an excuse to push through a wish-list of liberal and socialist policies like the Green New Deal that will drive up the cost of energy for American families and businesses while costing taxpayers trillions of dollars.

After debate, nearly all voters agree with investing in clean energy as part of recovery. High intensity with younger voters and Sun Belt

Now that you have read those arguments, please indicate whether you agree or disagree with the following statement: “We should make significant investments in clean energy as part of our efforts to rebuild the economy.”

After debate, centering generic ballot around clean energy as part of the recovery shifts it toward Dems by a net 42 points

If the general election for Congress were today between the Democratic candidate who supports making significant investments in clean energy as part of our efforts to rebuild the economy and the Republican candidate who opposes making significant investments in clean energy as part of our efforts to rebuild the economy, for whom would you vote?
